

Industrial

William Gough & Sons Limited is one of the West Midlands' leading Principal Building and Refurbishment Contractors, working with more than 100 clients every year.

Our attention to detail, wealth of experience and range of skills across all construction disciplines make us the ideal partner for projects that need to be completed to the highest quality, on time and to budget.

Working with a host of architects, commercial and industrial property owners and the public sector, we are passionate at turning ideas into reality, providing aesthetically pleasing buildings that offer excellent functionality and environmental performance.

In the last year alone, we have used this approach to deliver high-profile office developments, new leisure facilities, school and hospital extensions, factory conversions and in breathing new life into listed buildings.

These are often completed whilst working in live environments, utilising our project management skills and supply chain management to ensure the customer continues to operate.

We are able to deliver small contracts, right through to projects in excess of £2m.

Matrix 100 Chester

The site was built some 8 years prior but the recession caused the shell to be incomplete with just a cladded portal frame. We installed a new laser levelled power floated floor finish and constructed new 2 storey office internally to CAT 1 spec with open plan office space, toilet block and open staged entrance lobby.
