## Commitment to achieving Net Zero

**William Gough & Sons Limited** is committed to achieving Net Zero emissions by **2040**.

## Baseline Emissions Footprint

Baseline emissions are a record of the greenhouse gases that have been produced in the past and were produced prior to the introduction of any strategies to reduce emissions. Baseline emissions are the reference point against which emissions reduction can be measured.

## Emissions reduction targets

In order to continue our progress to achieving Net Zero, we have adopted the following carbon reduction targets.

We project that carbon emissions will decrease over the next five years to **2,353 tCO<sub>2</sub>e** by 2030. This is a reduction of **14%**

Progress against these targets can be seen in the graph below:

## Carbon Reduction Projects

### Completed Carbon Reduction Initiatives

The following environmental management measures and projects have been completed or implemented since the 2022 baseline. The carbon emission reduction achieved by these schemes equate to **109 tCO<sub>2</sub>e**, a **5%**ge reduction against the 2022 baseline and the measures will be in effect

*Initiatives include:*

- *Investing in Euro 6 Engine vehicles*
- *Upgraded Head office using latest energy efficient heating/cooling/lighting equipment*
- *ISO14001 accreditation*
- *EV Company car scheme to encourage EV transition*
- *Solar panel installation at Head office powering 17 EV chargers*

In the future we hope to implement further measures such as:

*Reducing Scope 3 emissions through working with our supply chain and customers to:*

- Reduce emissions in production
- Reduce emissions and waste through packaging
- Encourage the use of sustainable materials

To reduce our Scope 1 and 2 emissions we intend to

Upgrade our fleet to Electric vehicles

Ensure that all power from the National Grid is sourced through renewable energy
